

STAGE 2

Setting paths:

```
cd /home/user01/springboot-25-log4j-structural/spring-boot-v2.5.0
```

```
R="$PWD/reports"
```

```
LOG4J_JAR="$R/runtime-libs/log4j-core-2.14.1.jar"
```

```
JNDI_CLASS="org/apache/logging/log4j/core/lookup/JndiLookup.class"
```

```
jar tf "$LOG4J_JAR" \  
  | grep -F "$JNDI_CLASS" \  
  | tee "$R/stage2-springboot-jndilookup-jar-inspection.txt"
```

Runtime classpath check:

```
cat > "$R/CheckJndiLookupPresence.java" <<'EOF'
```

```
public class CheckJndiLookupPresence {  
    public static void main(String[] args) throws Exception {  
        String className = "org.apache.logging.log4j.core.lookup.JndiLookup";  
  
        Class<?> clazz = Class.forName(  
            className,  
            false,  
            Thread.currentThread().getContextClassLoader()  
        );  
  
        System.out.println("CLASS_PRESENT=" + clazz.getName());  
        System.out.println("CODE_SOURCE=" +
```

```
        clazz.getProtectionDomain().getCodeSource().getLocation());
    }
}
EOF
```

```
javac -cp "$R/runtime-libs/*" "$R/CheckJndiLookupPresence.java"
```

```
java -cp "$R/runtime-libs/*:$R" CheckJndiLookupPresence \
| tee "$R/stage2-springboot-jndilookup-classpath-presence.txt"
```

Syft file level scan on expanded log4j jar:

```
rm -rf "$R/log4j-core-expanded"
```

```
mkdir -p "$R/log4j-core-expanded"
```

```
unzip -q "$LOG4J_JAR" -d "$R/log4j-core-expanded"
```

```
SYFT_FILE_METADATA_SELECTION=all \
```

```
syft dir:"$R/log4j-core-expanded" \
```

```
-o syft-json="$R/syft-log4j-core-expanded-files.json"
```

```
jq -r '
```

```
.. | objects
```

```
| select(
```

```
((.path // "") | test("JndiLookup\\.class$"))
```

```
or
```

```
((.location.path // "") | test("JndiLookup\\.class$"))
```

or

```
((.name // "") | test("JndiLookup\\.class$"))
```

```
)
```

```
' "$R/syft-log4j-core-expanded-files.json" \
```

```
| tee "$R/stage2-springboot-syft-jndillookup-class-evidence.json"
```

Search SBOMs for class evidence

```
for f in "$R"/*.json "$R"/*.cdx.json; do
```

```
  echo "==== $f ==="
```

```
  grep -i "JndiLookup" "$f" || echo "NOT REPORTED"
```

```
done | tee "$R/stage2-springboot-sbom-jndillookup-search.txt"
```
